SUMMARY

SecOps Specialist and Information Security Analyst with **4 years of hands-on, client-facing experience** across enterprise InfoSec, MSSP, and 24/7 SOC environments. Core focus on **FortiGate NGFW administration**, **SIEM/UEBA operations** (Splunk, Azure Sentinel, Gurucul), **DLP policy engineering** (Forcepoint), and **EDR/XDR management** (Bitdefender, Cortex XDR, CrowdStrike). Experienced in building security automation workflows (**Python, n8n, REST APIs**) and writing custom detection rules (**KQL, SPL, Sigma, YARA**) mapped to the **MITRE ATT&CK** framework to streamline incident investigation and response.

TECHNICAL SKILLS

- **Core SIEM & Log Analytics (Hands-On):** Splunk (SPL, Dashboards, Alerts), Microsoft Azure Sentinel (KQL, Workbooks), Gurucul NG-SIEM (Log Onboarding, Parsing, UEBA), FortiAnalyzer
- **Network & Infrastructure Security (Hands-On):** Fortinet FortiGate (FortiOS, Policy Hardening, NAT, Routing, IPsec/SSL VPN, Security Profiles), FortiMail, FortiDeceptor, NAC, WAF
- **Data, Identity & Cloud Security (Hands-On):** Forcepoint DLP (100+ Policies), Varonis DatAlert, Imperva DBFW, Wiz, AdaptiveShield, XM Cyber, ADAudit Plus, Entra ID (Azure AD), Active Directory
- **Endpoint Security — EDR / XDR (Hands-On):** Bitdefender GravityZone EDR, Palo Alto Cortex XDR, CrowdStrike Falcon | *Prior SOC Triage:* SentinelOne, Microsoft Defender for Endpoint, Cisco AMP
- **Automation, Detection & Awareness (Hands-On):** Python (Telethon, APIs), n8n Workflow Automation, PowerShell, Sigma & YARA Rules, MITRE ATT&CK Mapping, VirusTotal & AbuseIPDB APIs, Wizer (Phishing Simulation), OSINT, Malware Triage
- **Additional SOC / MSSP Exposure:** IBM QRadar, Cortex XSOAR (Demisto), Siemplify, Splunk SOAR (Phantom), Cisco IronPort, IronScales, Carbon Black, FireEye, McAfee ePO

EXPERIENCE

SecOps Specialist — Overline Ltd. **Nov 2025 – Present | Ra'anana, Israel**

- **FortiGate Administration & Hardening:** Manage and configure **FortiGate** firewalls across **10 managed clients**, executing policy hardening, routing, NAT, IPsec/SSL VPN configurations, and advanced security profiles aligned with **CIS Benchmarks** and **NSE 4** practices.
- **SIEM Operations & Log Engineering:** Manage end-to-end **Gurucul NG-SIEM** operations across client environments, including real-time incident investigation, threat detection modeling, collector agent deployment, and custom log parsing/normalization for accurate behavior analytics.
- **Security Automation (n8n & APIs):** Built automated threat intelligence workflows using **n8n, VirusTotal, AbuseIPDB, and GitHub** to enrich IOCs and dynamically update external blocklists across **FortiGate** and **FortiMail**, cutting manual IOC triage and blocking time from minutes to seconds.
- **Incident Response & EDR Management:** Investigate real-time security alerts across **SIEM, Bitdefender EDR, Cortex XDR, CrowdStrike, Cisco AMP, FortiDeceptor, NAC, and WAF**, driving EDR policy tuning and continuous vulnerability assessments.
- **Phishing Simulation & Security Awareness:** Run **Wizer**-based phishing simulation campaigns across managed client environments to evaluate employee readiness and support client security-awareness programs.

Information Security Analyst — Migdal Group **Jun 2024 – Aug 2025 | Petah Tikva, Israel**

- **Data Loss Prevention (DLP):** Engineered, tuned, and maintained **100+ Forcepoint DLP policies**, safeguarding sensitive financial and organizational data across multiple business environments.
- **Splunk Detection & Monitoring:** Developed custom **Splunk (SPL)** dashboards, correlation alerts, and reports within a **1TB/day** log environment to support proactive threat detection and compliance visibility.
- **Azure Sentinel Hunting (KQL):** Utilized **KQL** in **Microsoft Azure Sentinel** for Advanced Hunting and proactive threat triage mapped to **MITRE ATT&CK**; customized **Office 365 and Entra ID Workbooks** to meet organizational monitoring requirements.
- **Database, File & Posture Security:** Created custom detection rules and investigated security incidents using **Varonis DatAlert** and **Imperva DBFW**; monitored security posture across **Wiz, AdaptiveShield, XM Cyber, ADAudit Plus, GlassBox, and Intellinx**.

SOC Analyst — Citadel Cyber Security **Sep 2022 – Mar 2024 | Rehovot, Israel**

- **24/7 MSSP Alert Triage & Monitoring:** Performed continuous threat monitoring and alert triage in a 24/7 MSSP SOC supporting **~20 clients** across finance, insurance, semiconductor, cybersecurity, and national payment-infrastructure sectors using **QRadar** and **Splunk**.
- **Client Security Account Ownership:** Served as the designated security account owner for a major Israeli credit-card issuer, acting as the primary SOC point of contact alongside the team lead for ongoing client communication and incident updates.
- **Incident Response & SOAR Execution:** Analyzed and responded to endpoint and network security alerts across **Cortex XDR, CrowdStrike, SentinelOne, and Defender ATP**, utilizing **Cortex XSOAR (Demisto), Siemplify, and Splunk SOAR (Phantom)** playbooks for containment and participating alongside the credit-card client in vendor-led **Splunk SOAR** rollout training.
- **Email Security Analysis:** Investigated phishing campaigns and malicious attachments across client mail relays (**FortiMail, IronPort, Forcepoint, IronScales, BrightMail, Dcoya**).

PROJECTS & OSINT INVOLVEMENT

FortiOS Security Auditor [fortios-security-auditor] **2026 | Open-Source Chrome Extension**

- Built an open-source, client-side auditing tool (Manifest V3) that parses static **FortiGate** and **FortiAnalyzer** configuration files and logs, running **50+ automated security checks** against **CIS Benchmarks** to identify misconfigurations.

Detection Rules & Malware Triage Lab **2025 – 2026 | Self-Directed Lab**

- Wrote custom **Sigma** and **YARA** detection rules mapped to **MITRE ATT&CK** for emerging CVEs (including CVE-2025-55182) and Windows post-exploitation artifacts (process creation, WMI, Registry), testing rules in local Linux/Docker lab environments.

Additional Open-Source Tools

- Endpoint-Logon-Tracker-PowerShell-to-n8n-to-Telegram — Endpoint logon alerting via **PowerShell**, **n8n**, and **Telegram**.
- Splunk-GitHub-Domain-Monitor — Pulls domain lists from **GitHub** into **Splunk**.

OSINT Volunteer — Project Maat **Nov 2022 – Present | Israel**

- **Telegram OSINT Automation:** Developed and deployed a **Python** automation script utilizing **Telegram's API (Telethon)** to support online child-safety OSINT investigations and real-time threat-actor monitoring.
- **Intelligence & Evidence Compilation:** Performed OSINT analysis and collaborated with cybersecurity specialists on digital evidence compilation for legal proceedings, contributing to the identification and arrest of **20+ offenders**.

EDUCATION & CERTIFICATIONS

- **Fortinet Certified Professional (NSE 4 — FortiOS)** | 45-Hour Intensive Course *(In Progress — Target Exam: Q4 2026)*
- **Bitdefender Certified Technical Specialist** | Bitdefender Service Providers Portfolio *(2026)*
- **Linux Essentials (20-Hour Intensive Course)** | Linux Professional Institute (LPI) *(2026)*
- **Practical Malware Analysis & Triage (PMAT)** | TCM Security *(2025)*
- **Certified Hands-On Cyber Security Specialist** | KERNELiOS College, Rishon LeZion — 306-Hour Course *(2021)*
